8. Main Content

The Regulations amend the Water Supply (Water Quality) Regulations 2000 ("the principal Regulations") which apply broadly in England.

Paragraph (21) of regulation 2 the draft amending Regulations inserts a new charging provision for handling applications for approvals under regulation 31 of the principal Regulations.

Regulation 31 of the principal Regulations allows the Drinking Water Inspectorate (on behalf of the Secretary of State for Environment, Food and Rural Affairs) to approve substances and products used in the provision of public water supplies in England. Approval may be given in response to an application under regulation 31(5). A list of the approved substances and products is published at least once each year under regulation 31(12).

Regulation 31(3) of the principal Regulations recognises equivalent EEA measures.

The UK will fulfil its obligation under Article 12 of Directive 98/34/EC when these Regulations are officially published.

9. Brief Statement of Grounds

Regulation 31 is intended to ensure that water companies do not use substances or products that will adversely affect the quality of drinking water or cause a risk to the health of consumers. The amendment to regulation 31 inserts a provision to enable the Secretary of State to make a reasonable charge to meet administration costs of handling applications for approval.
