8. Main Content

The aim of this draft order is the mandatory implementation of standard NFD21-351 by incorporating that standard into Annex A of the amended order of 24 October 1984.

If a European standard on pressure cookers is adopted the French standard referred to in the Annex will reflect that standard. The attention of the French authorities has recently been drawn to the presence on the market of fast, pressurized cooking equipment which present a hazard to users or even, in a certain number of cases, having caused accidents.

Since products of this type are in wide daily use in French households and since a reduction in the number of households accidents is a government priority, this draft order is intended to make pressure cookers safer to use.

9. Brief Statement of Grounds

Decree No 84-74 of 26 January 1984, in its amended form, and the Order of 24 October 1984, in its amended form (both documents have already been sent to the Commission on the occasion of earlier notifications concerning orders requiring the implementation of standards).
