8. Main Content

The model contract document for landscape planting comprises terms and conditions of contract, specification and appendices for use in conjunction with civil engineering contracts as volume 1.

Volume 2 is a free standing version for use in minor landscape planting operations. The main content of both volumes is description of all the operations required in landscape planting contracts for highways. These operations concern the provision of materials, site preparation, planting, guarding, mulching and after care of trees, shrubs, bulbs, wild flowers and aquatic plants.

Notes for guidance, bills of quantities and associated method of measurement are included.

The United Kingdom would like to be informed by other member states of their own standards or regulations offering an equivalent level of safety and security.

9. Brief Statement of Grounds

The measure proposed is a model purchasing specification prepared by the united kingdom national highway authorities for use in their contracts for the procurement of landscape planting. It does not lay down requirements for the placing of products and materials on the united kingdom market or for their use outside the contracts concerned.

The purpose of the measure is to ensure that:

- 1) Roads procured by the united kingdom government are sympathetic to the environment and make the most effective use of public money.
- 2) The administration of the construction of national roads complies with community and national law.
