5. Title

Draft Royal Decree approving the Instruction governing the design and construction of prestressed concrete structures (EP-93)

6. Products Concerned

Prestressed concrete

7. Notification Under Another Act

-

8. Main Content

It is a question of replacing the original Instruction governing the design and construction of prestressed concrete structures (EP-77). The aim of this proposal is twofold: firstly, to bring the various paragraphs which should have a homogeneous content into line with what is permissible in the Instruction governing the design and construction of reinforced or mortar concrete (EH-91) and, secondly, to bring the content of other paragraphs into line with current technical developments where this is appropriate.

9. Brief Statement of Grounds

The Standing Committee on Concrete has considered it necessary to implement this proposal in order to bring its related sections into line with EH-91 and to bring other sections of it into line with current technical developments or else to improve, clarify or update its wording.
