3. Originating Department

Highways Agency, an executive agency of the Department of Transport.

4. Notification Number

96/0190/UK

5. Title

HD 31/94 amendment no.2 maintenance of bituminous roads

6. Products Concerned

Overbanding systems for sealing cracks in bituminous surfacing.

7. Notification Under Another Act

-

8. Main Content

This amendment replaces the existing chapter 2 "surface treatments" dated January 1994. The Standard details the options available for the methods and materials required to seal cracks or joints in bituminous surfacing and increases the required skidding resistance of certain crack sealants. A mutual recognition clause is already included in the introduction to DMRB HD31/94. (notification ref: 92/0337/UK) amendment no.1 (notification ref: 94/0070/UK).

The Standard has been drawn up by procurement bodies for nationally funded roads in the UK and will be mandatory by administrative action for the procurement of roads.

9. Brief Statement of Grounds

As a result of a number of serious and fatal traffic accidents it has been concluded that requirements for skidding resistance of crack sealants with an in service width exceeding 20mm need to be increased to maintain levels of safety.

The published document will be reviewed when any relevant European technical approvals or standards, whether harmonised or not, are introduced.
