8. Main Content

The Decree sets out the procedures by which the manufacturer should verify the safety level of new electrifiers of types whose certificate of conformity was issued prior to 20 February 2009. The manufacturer shall verify that the maximum energy per pulse of new devices sold (internal company verification) is less than 5 joules at a resistance of 50 to 500 ohms or that the device meets equivalent technical specifications. It shall identify the devices which may continue to be sold in the country. For other devices, it shall make any necessary technical modifications and perform a new conformity evaluation. It shall update the manufacturing file.

Keywords: fence electrifier safety, placement on the market, new device safety level verification

9. Brief Statement of Grounds

Development of the state-of-the-art and technology has given rise to the observation that certain new electrifiers belonging to types certified before 2009 may be hazardous.
