**5. Title**

Order on the technical conditions relating to the connection  
of installation for the autonomous production of electrical  
energy to HTA and BT public networks which are not linked to  
a large interconnected network.

**6. Products Concerned**

Electrical energy

**7. Notification Under Another Act**

-

**8. Main Content**

This Order lays down the technical conditions with which  
installations for the autonomous production of electrical  
energy must comply within the framework of their connection  
to

HTA and BT public networks which are not connected to a large  
interconnected network ("insular networks").

## 9. Brief Statement of Grounds

The development in the independent electrical energy production recorded in the last few years and the resulting growth in the number of applications to have production installations connected to the public distribution network with a view to distributing all or part of the energy produced has highlighted the absence of regulations laying down measures intended to limit the disturbances caused by these installations on this network.

Moreover, to prevent this development excessively affecting the quality of electricity distributed and the operation of the public network, two orders dated 21 July 1997 and 3 June 1998 have recently been passed in order to define the technical conditions to be implemented for these connections. The order notified here completes and amends these connection regulations in the case of "insular" networks.

## 10. Reference Documents - Basic Texts

- amended Law of 15 June 1906 on energy distribution
- amended Law of 8 April 1946 on the nationalisation of energy and gas
- Amended Decree of 20 May 1955 governing the relationships between the establishments referred to in articles 2 and 23 of the Law of 8 April 1946 and autonomous producers of electrical energy
- Decree of 23 December 1994 approving the type specifications accompanying the granting to Electricité de France of the main electrical energy supply network.
- first amendment of 10 April 1995 to the Agreement of 27 November 1958 on the granting to Electricité de France, the national provider, of the main electrical energy supply network
- Order of 21 July 1997 on the technical conditions relating to the connection to the public network of installations for the autonomous production of electrical energy of less than 1 megawatt.
- Order of 3 June 1998 on the technical conditions relating to the connection to the HTA public network of installations for the autonomous production of electrical energy with an installed power of more than 1 megawatt.

## 11. Invocation of the Emergency Procedure

No

## 12. Grounds for the Emergency

-

## 13. Confidentiality

No

**14. Fiscal measures**

No
