8. Main Content

This draft order defines the characteristics of composition, resistance, watertightness, biodegradability and combustibility applicable to coffins, watertight linings and impermeable covers. Models of these funerary items must have one or more certificates of conformity issued by one or more accredited organisations. The above-mentioned characteristics provide for performance requirements and the corresponding test protocols shall appear in the scope of accreditation.

9. Brief Statement of Grounds

This draft text defines the characteristics of composition, resistance, watertightness, biodegradability and combustibility, for coffins (Annex II) and for watertight linings and impermeable covers (Annex I). The purpose of these provisions is to ensure that the deceased are treated with respect and to limit the impact of these funerary items on the environment and on health.
