8. Main Content

Mobile video links are used for transporting video signals between one place of audiovisual production and a collection station which redirects these signals to the production or broadcasting studio. These transmission systems are generally composed of cordless mobile or portable cameras loaded onto all types of terrestrial and aerial vehicles. They are used chiefly by audiovisual and entertainment professionals and are employed on a daily basis in television, on stage and in the music and film industry (concerts, musicals, operas, political and sporting events, game shows, etc.).

The aim of the decision is to lay down the conditions of use of radio frequencies for mobile video links.

9. Brief Statement of Grounds

The decision to which this notification relates aims to implement Recommendation ERC/REC/25-10 of the European Conference of Postal and Telecommunications Administrations (CEPT) on frequency bands for temporary terrestrial audio and video links used by ancillary audio devices for programme making and broadcasting and Commission Implementing Decision (EU) 2016/339 of 8 March 2016 on the harmonisation of the 2010-2025 MHz frequency band for portable or mobile wireless video links and cordless cameras used for programme making and special events.
