5. Title

Draft Royal Decree approving the "structural concrete
guidelines (EHE)".

6. Products Concerned

Cement. Steel. Sand and cement, additives. Additions.
Prestressed accessories. Concrete.

7. Notification Under Another Act

-

8. Main Content

The aim of the draft technical regulations is to adapt the
current EH-91 and EP-93 guidelines to the new trends relating
to structural analysis, limit states, durability, execution
and control and for these to affect the planning and
execution of prestressed and reinforced concrete works,
incorporating the guidelines referred to, in a single text
(EHE). It is noted that annex 13 includes the national
document

implementing UNE standard ENV-1992-1-1 (Eurocode number 2,
part 1.1.), in order to enable implementation of said
standard.

The technical specifications required for the products are established by reference to UNE-EN standards or UNE standards if the former do not exist, in order to guarantee that the products are suitable for incorporation in the works and with the arrangement that the minimum documentation required for the products will be replaced, in due course, by the CE mark.

The Spanish authorities are aware that when harmonised European standards exist, these will replace those equivalent standards referred to in the text and will adopt the measures necessary for this.

9. Brief Statement of Grounds

Revise and update to form a single text the current guidelines EH-91 and EP-93 and enable use of the number 2 Euro code.

10. Reference Documents - Basic Texts

Guidelines for the planning and execution of mass or reinforced concrete works, EH-91. (Notification 90/0379/E).

Guidelines for the planning and execution of prestressed concrete works, EP-93. (Notification 92/0353/E).
